REMARKS

5 Claims 5 and 7 have been amended to remove the  
Examiner's rejection under 35 U.S.C. 112, first paragraph as  
set out in greater detail below. Claim 6 has been amended  
to preempt a similar rejection to that claim also as set out  
below. Claims 1-7, 18-21 and 26 remain in this application  
and stand for examination. Reconsideration is requested in  
view of today's amendments which applicant submits should  
overcome the sole remaining rejection of the Examiner as set  
out in the December 22, 2005 action.

Rejection of claims 5 and 7 for indefiniteness

The Examiner rejects claims 5 and 7 under 35  
U.S.C. 112, first paragraph, as containing new matter.

15 The Examiner is quite correct in that there is no  
disclosure of the air passageway releasing air both above  
and below the panel member. Rather, as set out in the  
specification at page 25, lines 7-24, the air passageway 301  
has two separate configurations. In the first configuration,  
openings 302 in the passageway 301 allow air to be released  
20 below the panel member 300. In the second configuration,  
the air openings 303 are provided in the panel member 300 to  
allow air to be released above the panel member 300. There  
is no disclosure of air being released simultaneously both  
above and below the panel member 300.

25 By today's amendment to claim 5, it is made clear  
that air is released above the panel member 300 in the  
second configuration described above and by today's  
amendment to claim 7, it is made clear that air is released  
above the panel member 300 by way of perforations extending  
30 through the panel member 300. Similarly, today's amendment  
to claim 6 makes it clear that the perforations in the side  
of the air passageway thereby allow air to escape below the  
panel member.

- 8 -

In view of the above, applicant submits that this case is now in condition for allowance. Reexamination and removal of the rejection is requested and allowance of claims 1-7, 18-21 and 26 is solicited.
